ADDITIONAL INFORMATION

In 2005, it was discovered that only specifically-sized fractions of Acemannan (Aloe vera's bioactive molecule) were small enough to be absorbed directly into the blood stream, and other slightly larger fractions actually facilitated the plant's amazing immunomodulatory ("immune balancing") effect. Immūn contains a proprietary concentration of these immune balancing Acemannan fractions, offering powerful integrative health support.

Betalains, a natural compound found in various fruits & vegetables, is known as "nature's anti-inflammatory." The active ingredient in Limitless contains the highest concentration of betalains from beet root extract available with zero sugar, due to a patent-pending chemical-free extraction process. In a study, this formulation was found to reduce inflammatory markers up to 47%. To read the study, scan the QR Code below or type this link into your browser: www.evolhealth.com/betalain-study
